Boiler Trace Kit Contents

Pre-terminated lengths;

- 2 metre 32W
- 4 metre 64W
- 6 metre 96W
- 8 metre 128W
- 10 metre 160W

Complete kit, self regulating, with built in thermostat, RCD, power lead, pipe T piece, junction box & ties.

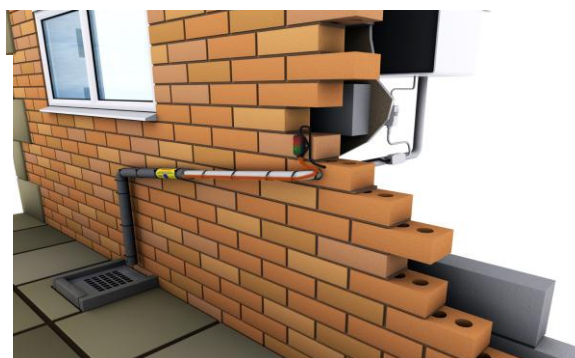

BoilerTrace is a quick and safe frost protection solution suitable for both DIY or specialist contractor. It is supplied ready terminated with an in-line moulded thermostat (switches on at +5°C and off at +9°), a 1m power cable, and RCD, junction box, and all accessories for installation. The combination of self regulation and temperature control, makes BoilerTrace completely safe, with maximum energy efficiency. It is suitable for both plastic and metal pipes. If the heating cable is too long you can simply double it back along the pipe, or cut the cable end to the required length and then re-seal it with the spare end seal provided in the kit.
